Precision Rod Ends & Spherical Bearings

Automotive Catalog

F.K. Bearings came onto the scene quietly over 30 years ago. They did not make a huge splash, but quickly won the customers over with fair pricing and plenty of inventory. While the industrial market struggled to get product from the old stand-bys, the racing market embraced a supplier that would maintain inventory throughout the limited season. To further assure timely delivery and customer's needs, F.K. Bearing has two regional warehouses. Filled to the brim with inventory, these warehouses can offer localized service for emergency orders.

Over the years the F.K. Bearing product line has grown to encompass many different industries. From the wilds of Baja Mexico, to the "good old boys" of NASCAR.... from mowers to care for your lawn, to fitness equipment to groom your body, you'll find F.K. products!

In your hands is our latest offering in an evolving program designed to supply rod end products to users everywhere! You will find rod ends and spherical bearings made from mild steel, chromemoly/alloy steel, aluminum and stainless steel. Special care is taken during every step of the manufacturing process to insure you the highest quality products.

With approximately 10,000 combinations of rod ends and spherical bearings available, you will appreciate the effort that goes into filling each order. Within our state-of-the-art facility, we carefully craft our products, so we are able to say, "Yes, it's in stock" when you call.

CUSTOMER SERVICE

All F.K. Bearings' sales personnel have extensive product training to assist you in the selection of the proper bearing for your application. District sales representatives for F.K. work very closely with inside sales and engineering, to ensure excellent service and on time delivery.

ISO 9001:2008 Registered

In 2010 F.K. Bearings was honored with a ISO 9001:2008 compliance. In today's competitive business environment, effective management systems are indispensable. You can be confident that you are doing business with an organization that can deliver goods and services in a timely manner and that your needs will be met. The ISO 9001:2008 registration ensures that F.K. Bearings does indeed have the systems and infrastructure in place to conduct business effectively. We can deliver what we promise.

Thank you for your interest in F.K. Bearings!

RERS SERIES BOOTS

TOTALLY ENCLOSE AND PROTECT THE ROD END FROM DIRT AND WATER

These “boots” completely enclose the head portion of the rod end and are held in place with the mounting bolt.

The job of the boot is to completely protect the rod end from all types of contamination. In severe duty, inspect regularly for any openings that would allow dirt and water to enter.

Standard package contains six boots.
